Introduction

The following preliminary report represents a first phase in the preparation of a comprehensive open space and recreation plan for Boston. It is divided into three sections. The first contains neighborhood summaries of data collected in a 1977-78 inventory of Boston's open space conducted for the City of Boston Parks and Recreation Department by the Boston Redevelopment Authority. The second contains tables representing a rough preliminary analysis of open space needs and supply based on the inventory and 1970 Census information. The third contains copies of computer printouts which present selected inventory data.

I. District Open Space Profiles

I. District Open Space Profiles

The first step in this open space planning effort was obtaining an accurate picture of open space resources and population characteristics by neighborhood. To this end, a detailed inventory of existing open space was conducted by Boston Redevelopment Authority neighborhood planners and summer interns in 1977 and 1978. (See Inventory Form, Appendix 1). The purpose of the inventory was to determine the number, size and current conditions of existing facilities. All inventory data were entered into the City of Boston computer system using a specially prepared version of a Boston Redevelopment Authority information system that allows for convenient use by the Parks and Recreation Department and facilitates future updating.

Prior surveys done by the Boston Redevelopment Authority and the Public Facilities Department in 1967, 1975 and 1976 were used as a base for the inventory work. Discrepancies in the information sources were checked with Parks and Recreation and in the field where possible.

draft JA 1/24/7

Selected printouts of computerized inventory data are included in Section III. This information forms the basis of the neighborhood summaries which follow.

Neighborhood boundaries conform to the boundaries of Boston Redevelopment Authority planning districts.

Population age, income, and automobile ownership data are taken from the 1970 Census.

Numbers on the maps correspond to the site numbers on the computer printouts. As indicated on the maps, several sites have not yet been mapped.

The acreage shown under "Urban Wilds" at the top left of each page indicates the amount of land listed in the Boston Redevelopment Authority Urban Wilds Report. Only a small portion of this land is actually under public ownership.

Urban Wilds - 580.92 acres

II. Preliminary Analysis of Open Space Supply and Needs

II. Preliminary Analysis of Open Space Supply and Needs

The tables included in this section represent a preliminary effort to analyze the inventory and population data and make initial rankings of priority neighborhoods. It should be noted that this effort is based on statistical indicators only. It in no way incorporates existing City policy or priorities, community inputs, or planned new development into the recommendations. The tables represent commonly accepted indicators of open space needs and standards for supply of various types of facilities, as follows:

Needs Indicators

Table 1: Population Density

The higher the density of population, the greater the need for public open space. It is not surprising that the three intown neighborhoods of Back Bay, South End and Fenway are most densely populated. North End/Waterfront and South Cove, however, rank surprisingly low, probably due to the fact that their population has increased since the 1970 Census. Factors such as

large land areas devoted to industrial (South Boston) or transportation (Chinatown/ South Cove) use, or both (Charlestown) can reduce apparent densities without reducing the need for open space facilities.

Table 1

draft JA 4-24-79

Tables 2-4: Age Breakdown of Population

These tables give an indication of the percentages of children, teenagers and elderly in the population by neighborhood. These age groups are most "needy" in terms of public open space.

Besides showing relative need, the tables can also be used to evaluate the adequacy and suitability of the various types of open space and facilities in each neighborhood.

South Cove/Chinatown has been omitted from the population analysis due to lack of consistent data.

Table 5: Income

The last need indicator is family income. Residents of neighborhoods with a low median income are less able to travel elsewhere for recreation or to supply their own recreation in the home or back yard.

Supply Indicators

Tables 6 & 7: Public Open Space Acreage/Population

Table 6 gives a summary of the overall amount of open space access per population. This is a very rough indicator of open space supply. The table compares the Boston supply to standards set forth by the National Parks and Recreation Association. It can be seen that in terms of these standards, Boston's neighborhoods are grossly deficient with the exception of Hyde Park and Franklin Field. However, the suitability of these standards to an urban setting has been questioned.

Table 7 ranks Boston's neighborhoods on the basis of open space acreage per 1,000 population. This is a crude indicator of need because it excludes private open space (lawns).

Tables 8-10: Types of Open Space

Table 8 shows the acreage of open active and passive open space in each neighborhood.

Table 9 provides the same information for neighborhood versus citywide open space.

Table 10 summarizes this information for Boston and compares the City totals to National Parks and Recreation Association Standards. (50% active, 50% passive; 75% citywide and 25% neighborhood oriented). A detailed breakdown of the information in Tables 8-10 is included in the neighborhood profiles.

PRELIMINARY
SUBJECT TO STUDY & REVISION

Tables 11-13: Summary Tables

Table 11 summarizes the rankings of each neighborhood for the one supply indicator (acres per population) and the five need indicators.

Adding together the need indicator ranking for each neighborhood produces an overall needs ranking, which along with the supply ranking is presented in Table 12. Adding the two together produces a total score which can be used to provide a "composite rank", also included in Table 12.

Table 13 combines all the rankings into a rough listing of open space priorities by neighborhood. It must be understood that this list must be used in combination with other information on the neighborhoods and the specific site level to be meaningful. It is meant to be used only as a first step toward preparing a specific action plan.

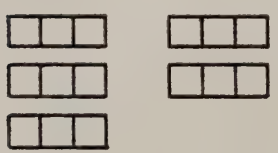
7. Using the code list from the previous question, please list up to five activities for which the site is suitable but for which it is not now used.



Appendix A2
Coding Instructions

Inventory Procedure

1. The inventory will be conducted by the BRA neighborhood planners with assistance from Parks Department district foremen. To reach the foremen, call the appropriate regional superintendent from the attached list. Probably the best arrangement will be to have the foreman review the forms after you complete them. We have sent them a memo notifying them that you will call.

2. The inventory will include City of Boston facilities, MDC facilities, private facilities now used or with potential for recreational use, areas used informally for recreation and natural areas (Urban Wilds).

3. Existing inventory information from several sources will be distributed as a base.

4. An inventory form has been prepared for each site. Write your name on the cover of each form. Instructions are included below.

5. All information about each site must be recorded on the inventory form.

6. Where questions do not apply to the site, write N.A. in the blanks (not applicable).

7. If you have any questions, please ask Jane Algmin, Elliot Rhodeside or Jim Dunn, our summer intern.

8. Jim Dunn will be available if you need help in tracing information or conducting the survey.

Instructions

Instructions are included here for those questions not obviously self-explanatory.

1. Site number: Do not fill in. This number will be assigned by the open space plan staff. Instead, number all sites you inventory with your own system, and key the numbers to a district base map.

3. Official name of open space: Name used in official records, found on sign, etc. Please abbreviate if longer than 35 characters.

4. Commonly used name: If different than official name, include name used by neighborhood people.

10-15. Census tracts: Include tract in which site is located and any tracts which it immediately serves (i.e. all tracts surrounding a large facility). Don't worry about "regional" facilities.

16-29. Identification information: Fill in numbers from maps, reports, etc.

30-31. Fill in acreage, if possible to two decimal places. For sites under 1 acre, also include square footage.

32. Site accessibility: This question is especially useful for private/institutional facilities which we may wish to recommend be made more accessible to public.

33. Auto access: Yes, a few sites (harbor islands) are not accessible by car.

36. Type of open space: Here we are trying to classify the general type of open space resources. These categories are meant to be mutually exclusive and to include specific types of facilities. For example, a playfield might include a tot lot, a softball field, a basketball court and a sitting area. These specific facilities will be treated later. The following definitions are included as a guide.

01. Multi-purpose park - Area which includes both passive recreation areas, often landscaped or natural, and areas for active play of children and adults.

02. Playground - Approximately 3-8 acres, designed primarily for the play of children between the ages of 6-15. Space and equipment is provided for informal games (tennis), softball and basketball. Larger playgrounds may also support baseball and/or football. Often facilities are provided for the play of young children and teenagers as well.

03. Playfield - Over 8 acres. These acres can support active, organized team sports and provide facilities for baseball, softball, basketball, football, tennis, etc. Primarily used by teenagers and adults but may include areas for the play of young children and quiet activities for all ages as secondary features.

04. Playlot - Less than 3 acres, usually designed to serve small children but may have basketball courts and small, sitting areas. Also included are those small, active recreation areas such as basketball or tennis courts.

05. Multi-purpose indoor centers - Indoor center which serves a variety of recreation needs by providing areas for active recreation, meetings, art studios, workshops and the like (e.g. YMCA).

06. Special-purpose indoor center - Indoor facility with a single primary use (e.g. indoor skating rink).

16. Undeveloped natural area - Areas which have retained or re-established considerable natural character. These are undisturbed with a diversity of natural features and vegetation and are in generally excellent condition, of high scenic value, offers opportunity for a wide variety of educational and recreational uses.

17. Natural areas with potential for restoration - Areas which have predominant natural features but have been disturbed due to illegal dumping, prior industrial use, or the like. These areas still offer outdoor recreation opportunities, although landscaping,sometimes on a large scale, is needed to restore their original character.

25. Malls/square/plazas - Usually small areas, landscaped, which serve primarily aesthetic purposes, but may serve passive recreation functions as well.

37. General condition of site: To try to be as objective as possible, we have defined general condition in terms of the condition of individual facilities. This question is best filled out after you complete Files 6 & 7. Add up the number of facilities in good, adequate, or unusable condition. If all facilities are in good condition, overall condition should be marked "good." If fewer than half the facilities are fair or unusable, overall condition is "fair," If more than half are in fair or unusable condition, overall condition is "poor." "Abandoned" should be used when all facilities are unusable or because so many are unusable park is never used.

38. Land use: This question obviously involves only a very generalized calculation. Specific comments on land use should be put in with your general comments.

39-48. Handicapped requirements: Following are the requirements set by the Barriers' Board for the facilities in which we are interested. Numbers refer to the Rules and Regulations of the Architectural Barriers Board (we have a copy for reference):

40. Drinking fountains: Where provided, at least one should be accessible by persons in wheelchairs: hand-operated button or lever, 34" maximum above floor, any recess in wall at least 30" side (p. 100).

41. Wheelchair ramps (sidewalk): Ramps should be located at intersections and all other street crossings: slope not to exceed one in twelve, width no less than 40', curb height no more than 7". Width of sidewalks no less than 48" (pp. 76-78).

42. Toilet facilities: In each restroom at least one water closet and one lavatory should be accessible to persons in wheelchairs: clear space of 60" at 12" height above ground in lavatory area; toilet stall 60" wide by 72" deep; seat 18" above floor maximum; door 36" wide; lock 36" above floor; two grab bars 42" long and 30" above floor (pp. 93-95).

43. Spectator facilities: Should provide seating capacity to be accessible and on a level area for people in wheelchairs. Area may have removable seating. Each space should be 60" long and 36" wide.

44. Bowling alleys: On floors otherwise accessible, alleys should provide at least 2 adjacent lanes accessible to wheelchairs.

45. Swimming pools: Should have entrance to pool by 30" ramp or mechanical lift and egress around pool at least 48" wide.

46. Locker rooms: Five percent of lockers should be accessible to wheelchairs (p. 112).

47. Showers: Showers should be accessible (stall 60" wide and 40" deep; hinged, padded seat 17" above floor (p. 120, p. 112)

48. Parking space: One per 25, two per 40, three per 100.... accessible to handicapped (12 foot wide space, curb cut to sidewalk and identification as handicapped spaces).

Obviously many of the facilities will not be present in most parks; just circle not applicable, if the facility is not present in the park.

49. Any brief comments on barriers would be appreciated, i.e. ramp poorly located; steps at main entrance, etc.

50. General comments: As briefly as possible list any special features of the site you wish to put into the computer for future reference (we have room for only 50 spaces). Any other observations are also welcome here; they will help us in developing the plan.

File 2

1-2. Ownership: For collating purposes, ownership has been divided into 4 catagories→ public (city and general), public (Mass), private (taxpaying) and private (tax-exempt). Circle the appropriate letter category, then circle the more specific type below. For open spaces where more than one owner is involved (i.e. Fenway), check all that apply.

File 3

Administering agency: The administrating agencies have also been classified by level of government. Here, too, check all that apply.

File 4

Public transportation: Check yes or no for accessibility of each mode. If nearest stop is over one mile, we consider it inaccessible. Then circle the code for distance to nearest stop. We have MBTA route maps if needed.

File 5

Natural features: Circle all that apply; specify "other" types, if any.

Files 6 & 7

Facilities:--existing and proposed

The purpose of this section is to record the condition and, if possible, use of existing facilities on the site, to record any recent improvements made to the site, and to list recommendations for changes to existing facilities or new facilities. Because of the computer space required by the

long list of facilities which might exist in the parks and indoor facilities, we have had to lump these questions together. Thus, this question is rather complicated.

Column I

Facilities within open space: existing and proposed

In this column, you should first list all the facilities existing on the site, and, later, any facilities recommended. To fill out the form, use the following lists.

Kind: We have divided all the facilities up into six categories, which should be coded as follows:

Kind of Facility	Code
Activity Area	A
Courts/Fields	B
Play/Sports Equipment	C
Street/Park Furniture	D
Indoor Facilities	E
Support/Maintenance Facilities	F

Type: Within these categories are long lists of all the facilities which might exist in the open space, as shown following: Put the code numbers shown here on the form under "TYPE". You may also jot down the type in letters for your own use.

TYPE OF FACILITY CODES

203. UNKNOWN
204. UNKNOWN

Name and Number

"Name" is included for any facilities which are know by a name different than that of the park (i.e. Roberto Clemente Field in the Fens). If names are used, list each facility separately and insert "1" under number. If there are ten tennis courts with no particular name, list together and put 10 under number. If any information in the next 3 columns differs for individual facilities, list them separately in Column I. If you do not have enough room on the form to list all the facilities, use a second form and attach it to the first. Fill out the name of the open space on the first page.

Column II - Existing Facilities

This information should be recorded for all facilities currently existing on the site (circle Y in first question).

Estimated Yearly Users: This may be available from the Parks Department foremen, MDC, etc. If not, it will be filled in later.

Surface: Fill in any surfaces/materials which apply to the facilities (can be more than one).

Surface/Material Code

Code	Material	Code	Material
1.	Wood	11.	Fiberglass
2.	Asphalt	12.	Gravel
3.	Concrete	13.	Canvas
4.	Metal	14.	Dirt
5.	Brick	15.	Clay
6.	Sand	1 .	Rope
7.	Bark Mulch	17.	Chain
8.	Grass	18.	Steel
9.	Iron	19.	Chainlink
10.	Granite	20.	Other
		21.	Unknown

Condition: This is the most important information for existing facilities. Use the definitions below:

1. GOOD - Usable with no repairs necessary

2. FAIR - Repairs necessary to improve usability

3. UNUSABLE

Column III - Recent Improvements

Circle the Y in the first question for any facilities which were newly built or improved in the past two years. Then circle the type of improvement as shown below:

1. New facility (built or added in past 2 years)

2. Repairs

3. Replaced

4. Removed* (facilities which you know were removed obviously do not now exist on site, so should be listed separately with "N" circled in Column II).

Fill in the cost, if possible, and the year completed in the next rows.

Column IV

Recommendations: Circle Y in the first row for any facility for which you wish to make a recommendation for repairs, removal, etc. If you wish to recommend construction of a facility which does not currently exist on the site, enter its Kind and Type in Column I, circle N in Columns II and III, Circle Y in Column IV and enter type, cost and suggested priority as below.

Type of Recommendation

Code	Type
1	New Facility
2	Repairs to Facility
3	Replacement of Facility
4	Remove Facility

Priority

Code	Type
1	1-3 years
2	4-6 years
3	7-10 years
4	over 10 years
5	don't know

A sample form is included here for your information.

File 7 - Recent Site Improvements

This question records overall improvements made to the site within the last two years. Circle the appropriate improvements and fill in the cost and year completed for each. Describe any improvements not included on the list.

File 8 - General Recommendations

This question covers recommendations for the site as a whole, as opposed to specific facilities. Circle any recommendations and fill in estimated cost and suggested priority, as below:

Code	Priority
1	1-3 years
2	4-6 years
3	7-10 years
4	over 10 years
5	don't know

"Acquisition" may be recommended for private or institutional facilities, vacant lots, etc. Describe any recommendations not included on the list.

File 9

Activity Groups

Circle any organized activity groups which use the site, and write the names of the groups, if known and the sex of the groups (1, masc., 2, fem., 3, mixed). Describe any other groups in the boxes provided.

When Forms are Completed

After you have completed the first five forms, please return them to the Open Space Plan staff. We will use these as a trial to see if any changes in the form or the computer files are necessary. After any necessary revisions are made, we will distribute the final questionnaire. As you finish a reasonable number of forms, turn them into us so that we can enter them into the computer as we go along.
